

HAYDEN CAI

Full Stack Developer

ianyaheng822@gmail.com | (04) 1078 0822 | Melbourne, VIC 3135

SUMMARY

Dedicated Full stack Developer with 5 years of experience in creating responsive, user-centric websites and applications, proficient in React.js, Next.js, GraphQL, TypeScript, Node.js, TypeGraphQL. Skilled in building high-performance web applications and experienced in collaborating with designers, back-end developers, and stakeholders to deliver seamless user experiences. Additionally, experienced in back-end development with Node.js, Express, and SQL/NoSQL databases, developing RESTful APIs, and implementing server-side logic. Familiar with Agile methodologies, Git for version control, and writing unit/integration tests, with a passion for staying current with industry trends and technologies.

LINKEDIN

- [linkedin.com/in/hengcai/](https://www.linkedin.com/in/hengcai/)

- Front End: HTML5, CSS3, SASS, Tailwind CSS, Bootstrap, Responsive Web Design, JavaScript(ES6), Apollo Client, BFFs (Backends for Frontends Pattern), **TypeGraphQL**, Material-UI, jQuery, **ReactJS(hooks, reducer)**, React Testing Library, Cypress.
- Back End: **Node.js**, C#, ASP.NET Core (Learning), **GraphQL**, Restful API
- Database: SQL, MongoDB
- Develops Tools & Platforms: AWS (Lambda, S3, DynamoDB), Jira, Github, git, Postman, Prismic.
- Other: Agile, Figma, Prismic, Shopify API, Shopify Partner, SEO

WORK HISTORY

Nov 2024 - Current

Full Stack Software Developer

Findex - Melbourne, VIC

- Stack used includes **React**, **TypeScript**, **Node.js**, REST APIs, AWS, Material UI, Git, Docker
- Developed and delivered customer-facing web features using React(Redux) and TypeScript, focusing on performance, usability, and maintainable component architecture.
- Built reusable UI components and complex forms using React Hooks, Material UI, and form libraries, improving development efficiency and user experience.
- Designed and implemented backend APIs with Node.js and TypeScript, supporting frontend feature

requirements and enabling efficient data flows.

- Integrated frontend applications with AWS-based services, leveraging cloud infrastructure to support scalable and reliable application deployments.
- Collaborated closely with product managers and designers to translate UX designs into responsive, accessible, and production-ready interfaces.
- Participated in technical design discussions and feature planning, contributing to architecture decisions across frontend and backend services.

Apr 2022 - Oct 2024

Front End Engineer

Bendigo And Adelaide Bank -
Melbourne

Stack used includes **React, Typescript, GraphQL**, Apollo Client, BFF(Backends For Frontend Pattern),

TypeGraphQL, Material-UI, Formik,API Gateway

- Designed and delivered customer-facing banking features using React, TypeScript, focusing on performance, usability, and maintainability.
- Built reusable and scalable component-driven UI architecture with Material UI and styled-components.
- Managed frontend data flow and API interactions through GraphQL and Apollo Client, reducing API complexity and improving data fetching efficiency.
- Implemented complex financial forms with React Hook Form, Formik, and Yup, improving form performance and validation reliability.
- Contributed to a BFF architecture (Node.js + TypeGraphQL) to provide optimized APIs for frontend consumption.
- Strengthened code quality through component documentation (Storybook) and end-to-end and unit testing (Cypress, React Testing Library).

Aug 2020 - Mar 2022

Front End Developer

Arkade - Melbourne

- Assisted in building reusable code and libraries for future use.
- Collaborated with designer, product, and back-end teams to make sure the code implementation meet design requirements, business specifications.
- Worked as client support to provide effective troubleshooting and remediation for web applications.
- Technologies: HTML5, CSS3, Tailwind CSS, Sass, Typescript, Next.js, **React**(hooks, reducer), Less, GraphQL, Shopify Plus, Prismic (CMS), Algolia, Vercel built for Next.js, Zendesk

Jun 2020 - Aug 2020

Full Stack Developer(Internship)

SettleEasy - Melbourne

- Created API endpoints for testing and removing listings from MySQL database using functional programming.
- Performed bug fixes, implementing data fixes, and system maintenance.

- Technologies: HTML5, CSS3, React, StoryBook, MySQL, Nodejs
- Stack used includes Storybook, Vue, Meteor JS, MySQL, MongoDB, and AWS.

EDUCATION

Feb 2020

Diploma of Information Technology: Web Development Coding Bootcamp(full-time)

Coder Academy | Melbourne

- Recipient of Women Technology Scholarship
- Coursework in HTML5, CSS, Web Design, JavaScript, React, Node.js, Ruby on Rails, PostgreSQL, MongoDB

Mar 2019

Front End Development

JR Academy | Melbourne

Coursework in JavaScript, React, Node.js, C#

Aug 2013

Bachelor of Design

Southwest Forestry University | China
